

itelligence Teams with Paymetric to Streamline Secure Electronic Payments for Midsized Businesses

Collaboration integrates leading itelligence platforms and support in support of SAP® Business All-in-One with award-winning enterprise payment acceptance solutions

ORLANDO, Fla. – May 17, 2010 – itelligence, Inc. today announced they have selected Paymetric, Inc.'s solution to help midmarket companies affordably integrate and secure electronic payments within their ERP systems. Through the agreement, Paymetric's XiPay On-Demand and XiSecure On-Demand solutions will be pre-integrated with itelligence's solutions based on SAP® Business All-in-One solutions. In addition, itelligence will resell Paymetric's XiPay On-Demand and XiSecure On-Demand Solutions and provide Level 1 support for customers.

This unique strategic alliance brings together two award-winning SAP partners. Paymetric was awarded a 2009 SAP® Pinnacle Award in the area of Thought Leadership (SSP) for credit card tokenization solution development. itelligence recently received the 2009 SAP® Business All-in-One Partner of the Year, U.S. award as the SAP channel partner that delivered the most new accounts, performed against targets and exceeded customer satisfaction measures in the U.S.

itelligence's pre-integrated solutions and Paymetric's Software as a Service (SaaS) model makes it considerably more affordable for midmarket enterprises to drastically reduce their implementation costs. Paymetric's XiPay On-Demand eliminates the need for companies to make large investments in software licenses and annual maintenance by simply paying a monthly subscription fee. As a result, customers have access to the same award-winning technology tools and services larger enterprises run, but at a fraction of the cost.

"Many midmarket companies currently facing challenges in processing electronic payments are not aware of the available cost-effective solutions to help meet payment-automation, security and compliance objectives," said Steve Niesman, CEO and president of itelligence. "By working with Paymetric, itelligence is able to help customers streamline payment-acceptance processes, reduce the scope and financial burden of compliance requirements, and provide trusted, secure transaction processing from an award-winning solution provider."

Businesses that accept electronic payments are forced to comply with the Payment Card Industry Data Security Standards (PCI DSS). With data-security breaches and compliance costs on the rise, enterprises no longer want to accept the liability of keeping cardholder data stored in their environment. According to Verizon Business RISK Team research, two-thirds of data breach cases involved data that the organization did not know was on the compromised system. For these and other reasons, there is an increased interest in technology solutions like Paymetric's that utilize tokenization security technology. Tokenization eliminates the storage of cardholder data in merchant systems to drastically reduce the likelihood that a breach may occur.

"Without the ability to interface enterprise systems directly with card processors for authorization and settlement of electronic payment transactions, organizations can suffer numerous ramifications of manual, error-prone processes—from exposure to data-security breaches to higher transaction costs and

interchange fees to unacceptable business risks,” said Larry Wine, chief executive officer for Paymetric. “Paymetric’s XiPay On-Demand and XiSecure On-Demand Solutions will provide itelligence customers with an efficient, safe and affordable payment acceptance solution that will streamline the order-to-cash process, accelerate time to working capital, and reduce payment-acceptance costs and risks.”

XiSecure On-Demand, Paymetric’s tokenization solution, removes credit/debit cardholder data from a merchant’s payments systems and replaces it with a surrogate number, known as a “token.” This token can be passed throughout the enterprise to meet the demands of customer interactions and to support customer analytics, all without disruption to the business or risk of data exposure. XiSecure On-Demand affords companies the opportunity to eliminate the transmission and storage of sensitive cardholder data, radically improving data security and reducing the cost and scope of compliance with PCI DSS.

itelligence’s consultants, averaging more than 10 years of industry experience, provide industry best practices with a solid understanding of the robustness of SAP solutions in order to give customers the guidance and expertise needed to control their investments. itelligence offers a complete portfolio of services in support of SAP solutions, including licenses and consulting, as well as hosting, training and long-term customer support for the entire lifecycle of a business. Services are supported by 1,100 dedicated consultants who have successfully implemented SAP solutions for more than 500 international companies.

Today’s announcement was made at the SAPPHIRE® NOW conference, where itelligence is exhibiting in booth 2721 and Paymetric is exhibiting in booth 3009. The conference is being held in Orlando through May 19.

About Paymetric

Paymetric, Inc. is the leading provider of integrated and secure enterprise payment-acceptance solutions that enable companies to streamline the order-to-cash process, reduce the scope and financial burden of achieving PCI compliance, and improve return-on-electronic-payment acceptance. Paymetric’s solutions support virtually every type of electronic payment in any enterprise system where payment is accepted. Paymetric is recognized as an industry leader and is a three-time award-winning SAP partner with solutions certified by SAP AG.
