

CeBIT 2005 in Hanover from March 10 to 16, 2005

Innovation and industry skills form the focus of this year's CeBIT presentation by itelligence AG

Bielefeld, February 21, 2005 – itelligence AG, the innovative complete IT service provider for SAP systems, will be at the CeBIT in Hanover from March 10, to March 16, 2005. This year, the Company has a significantly larger exhibition area at Stand 38 in Hall 4. The main focus of the extensive trade fair presentation will be on innovative solutions for the mid-market, for example, the integration of SAP NetWeaver technology into itelligence mySAP All-in-One industry solutions, including the new mobile service under mySAP CRM, "it.mobil service". A particular highlight will be itelligence's presentation of "intelligent PDF documents" within SAP together with Adobe Deutschland GmbH.

SAP NetWeaver, Lotus Domino and BlackBerry

itelligence AG belongs to the exclusive circle of SAP NetWeaver special expertise partners. A new feature of the CeBIT trade fair will be itelligence's presentation of the direct integration of the new SAP NetWeaver technologies including, for example, SAP Enterprise Portal and SAP Business Warehouse (BW) into their mySAP All-in-One industry solutions for the classical and upper mid-market. itelligence will also be demonstrating the use of the new mySAP NetWeaver component technology Exchange Infrastructure (XI) 3.0 in Hanover.

With its new solution modules based on the SAP JavaConnectors, it.smartConnect and it.DominoSAPListener, itelligence AG will be presenting new developments that will allow more efficient integration of information between Lotus Domino and SAP R/3.

itelligence is providing additional benefits for work with the BlackBerry Handheld by providing access to SAP R/3 data. The Company's consultants will be demonstrating live how the BlackBerry can directly access current SAP R/3 data via SAP's web application server (SAP WAS)

itelligence industry solutions

Much of itelligence AG's exhibition space will be given over to the presentation of innovative process consultancy and SAP implementation. This includes the complete range of industry solutions for the classical and upper mid-market based on the mySAP All-in-One system: it.automotive supplier (automobile supplier), it.hightronics and it.engine (high-tech and manufacturing industry), it.metal (metal producers), it.chemicals (processing industry), it.wood (wood/furniture industry), it.service (service provider) and it.trade (business). Here, the integration of the mySAP customer relationship management (CRM) into itelligence's industry solutions is worth particular attention.

itelligence AG – Press Release, CeBIT 2005 in Hanover from March 10 to 16, 2005

Innovation and industry skills form the focus of this year's CeBIT presentation by itelligence AG

Fixed price packages

it.compact, itelligence AG's successful fixed price program for SAP systems has been significantly extended. The it.compact brochures with the mid-market program it.compact now include more than 70 customized packages. The "it.compact packages" are based on itelligence AG's experience of introducing many different SAP projects for mid-market companies. itelligence's it.compact program thus comprises both SAP add-ons developed by itelligence for the mid-market and further services from the area of human resources, support and logistics. "it.compact" also makes it possible for the mid-market to implement current themes such as business warehouse, product life cycle management or customer relationship management in the SAP environment at a fixed price with clearly established content.

Mobility using it.mobil service within SAP

The new itelligence solution within mySAP CRM, "it.mobile service" establishes a completely new link between field service and the SAP system. it.mobile service is used in the electronic capture of daily customer service information in the field. Such information, for example, proof of payment or records, can now be transferred to the head office or into the SAP system. Field employees can also now retrieve new, relevant data relating to assignments or changes to the customer base directly from the SAP system when visiting clients. The duplication of data as part of the service process is therefore avoided.

itelligence AG's partners at the trade fair

Adobe GmbH

Together with its new partner, Adobe GmbH, Germany, itelligence, as SAP's special expertise NetWeaver partner, will be presenting its innovative concepts for intelligent documents in the SAP environment. Adobe's "intelligent PDF data" makes it possible, for example, to generate interactive forms that can record defined data in a structured way. These can then be processed as documents using the technology integrated into NetWeaver into SAP systems. Adobe was founded in 1982 and, with annual revenues of approximately US 1.66 billion in 2004, is one of the world's largest software companies.

arxes NCC AG

The cooperation between arxes and itelligence provides customers with a capability that is virtually unique for mid-market IT service companies. The combination of both partners' services provides mid-market companies and smaller groups the opportunity to implement important IT services through an external partner – from using SAP consultancy through desktop services to the complete outsourcing of the IT infrastructure and related operation and managed service. The partners are particularly targeting the needs of the mid-market and smaller groups with their joint offer.

Innovation and industry skills form the focus of this year's CeBIT presentation by itelligence AG

itelligence & Soloplan

The cooperation between itelligence and Soloplan offers an integrated solution for the logistics service provider under the banner of it.transportation, the companies' joint, practical solution for the planning and management of transport processes, integrated freight-handling, coordination of logistics chains and management of all financial accounting, controlling and personnel management requirements.

Soloplan GmbH

With CarLo[®] the specialist in logistics software from Kempten, Germany, will be presenting an add-on for the SAP[®] Business Suite at the CeBIT. Complex requirements relating to transport planning, operations planning, freight movement, telematics integration or toll management represent just a few of the core competencies of CarLo[®]. CarLo[®] and SAP[®] communicate via the certified SD-TPS interface.

WSW Software GmbH

WSW Software GmbH from Krailling, Munich, will be presenting the new SPEEDI SAP add-on solutions for automotive processes within SAP. For many years WSW Software has specialized in intelligent SAP consulting combined with proven software solutions for business and industry. WSW Software is particularly well suited for modeling the logistics processes of automobile suppliers. In the special area of JIT/JIS, the company can rely on many years' of expertise, both with SAP and the company's own products.
