

itelligence and API completed the implementation in five months, well within the projected timeline. With guidance from itelligence, the aerospace company integrated a robust ERP system that made sense for API's size and vertical market.

"Supply Chain Management is increasingly critical within the aviation industry. The part values are significantly higher than in other industries and unavailability of parts can mean millions of dollars of lost revenue. Precise inventory control is necessary to reduce expensive 'just in case' inventory while also increasing aircraft availability and customer satisfaction" said Currence.

API plans to implement it.wholesale worldwide by February.

"We're pleased to add API to our expanding roster of companies in the midsize business space," said Steve Niesman, itelligence U.S. president and CEO. "This further solidifies itelligence's position as the leading choice for midsized companies seeking mySAP All-in-One solutions."

About itelligence
