IT strategy system goes live for Hunter

Staff -- 7/1/2005

Itelligence announced the "go live" of its manufacturing, a qualified, mySAP, all-in-one solution for the industrial machinery and components industry.

Hunter Manufacturing Co., a leading environmental equipment and protective filtration systems manufacturer for the Department of Defense, needed to streamline operational planning and execution, and selected itelligence, a leading SAP business partner and SAP services partner, to provide and implement the information infrastructure and functionality.

Hunter had three reasons to seek a new enterprise solution: it had outgrown its legacy system, installed in 1989; it was interested in moving from a product-oriented company to an integrator; and, as a federal contractor, it needed a secure technology that would guarantee business process integrity. But initially, Hunter looked at SAP with skepticism.

"We had the usual perceptions of SAP: too big, too complex and too expensive," says Steve Demko, Hunter's CFO. "What won us over was itelligence's approach to the mid-market and its pre-configured solution that makes for a manageable, rapid implementation."

Based on mySAP Business Suite, mySAP All-in-One solutions are pre-packaged, affordable and quick to implement, helping companies streamline business processes, increase efficiency, and achieve a rapid return on investment.
