ASP outsourcing The relief for your company

ASP outsourcing offers companies the opportunity to concentrate on their core competence. This is especially important for young, dynamic companies. They need a system which can respond flexibly to changing performance requirements and which can keep up with growth. But our ASP outsourcing solutions are also a highly interesting alternative for mid-size companies: we offer them a high availability of current software.

Our solutions

it.service is the right industry-specific solution for service providers who require the integration of their order processing into accounting and/or personnel management. It encompasses the company processes involved in customer transactions with various forms of invoicing. The recording of work hours and performances as well as the subcontracting of third-party performance are also possible. Controlling rounds off logistics with extensive reporting. The relevant data is automatically transmitted to financial accounting.

Our solution it.service is available in two variations: as a consulting solution for service providers who process customer orders within a short-term time span, and as project solution for companies who structure their orders in the form of projects.

ASP HR - Easy to go

With our pre-configured ASP-HR solution, we can offer mid-size companies a fast transition to a modern personnel management system based on SAP R/3. The system is the optimal support for personnel-management processes. Our industry-specific components enable us to tailor flexibly the personnel management system to meet your company's specific requirements.

You can find the latest information about our solutions at www.myit-service.de.

ASP in your company – four steps to the goal

We have developed the intelligence ASP Evaluation Model for the introduction of the ASP solution in your company. Step by step, we show you the processes of your ASP system. Defined milestones and check lists of the introduction process provide you with support for the set-up of your system.

1. Evaluation

You can test our ASP solutions on the Internet. A test link will give you direct access to our demo systems. So you can get a general idea of the basic functions of our solutions.

At the end of the evaluation phase there is an analysis of the extent to which our ASP solution functionally covered your business processes.

By the way: the test link and the check list are available to you free of charge on the Internet!

2. Personalized evaluation client

We provide you with a personalized evaluation client which contains the data evaluated from the check list.

This test system is a part of our software solution reserved for you alone, in which all of the processes you need are available. So you can thoroughly test your business processes.

During this phase, our SAP specialists, with their knowledge and experience, are at your side.

The latest information about our evaluation offer can be found on our Web site www.myit-service.de.

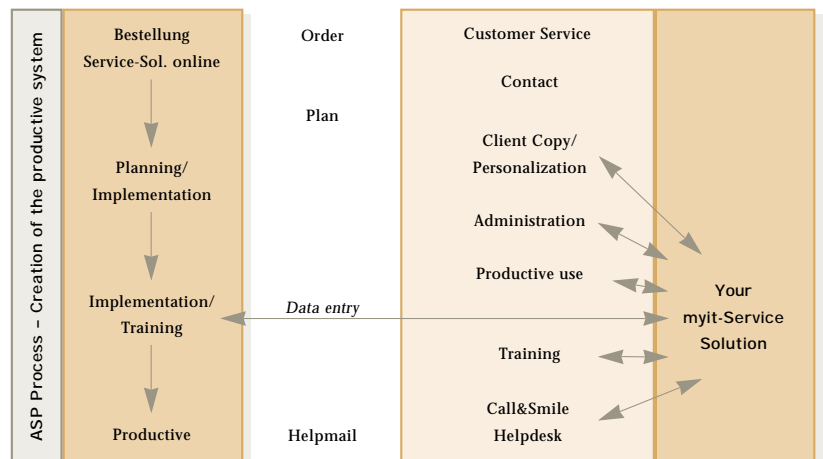

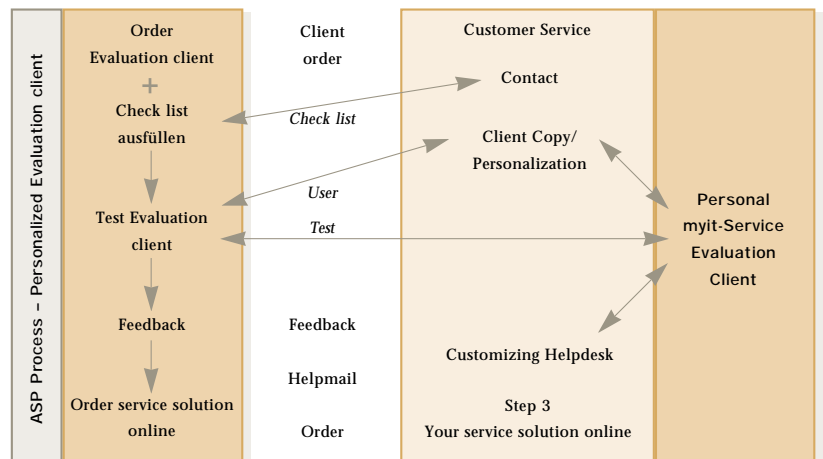

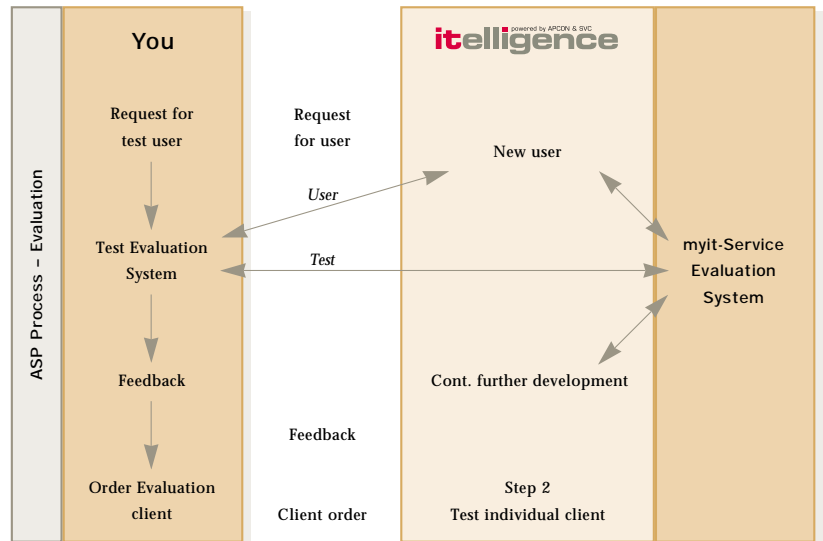

3. Creation of the productive system

In structuring and creating your productive system, we take into account the results and experience which you acquired in working with your evaluation system.

We train your employees in our training centres so that they can work with the ASP system on their own.

4. Productive operation

Our Help Desk will be there with support once your ASP system goes into productive operation. Here you will find at any time competent contact partners to answer your questions and help you with problems. Operation and maintenance of your system is performed by experienced administrators in our computer centres.

The advantages of our ASP outsourcing offer

- You avoid high investments in hardware and software and save on personnel and training costs for the operation of your IT system. The transparent monthly costs for installation and operation of your ASP solution is a secure foundation for your corporate planning.
- You can flexibly determine the services you want. Function comprehensiveness and the budget for the use of standard software can be planned for your company.
- Our ASP solutions offer you the stability and security of modern information systems at a favourable price.
- Your employees benefit from the advantages of proven ERP systems. The ASP products we use are fully developed industry-specific solutions based on SAP R/3.
- We are always available to you as a competent contact partner for your IT solution.

Our competence in ASP outsourcing

Our ASP offer is based on the core competences of our SAP specialists:

- We have had years of experience with outsourcing services. Our computer centres manage the systems of mid-size companies as well as large ones.
- The experience and know-how from innumerable projects have been implemented in our ASP solutions.
- We operate a Call & Smile Center. We ensure the secure productive operation of our solutions by means of problem-free communications and cooperation as partners.
- Our experienced consultants are responsible for the training of your employees in our training centres.

This competence enables us to offer you a modern, highly available, and professionally administrated system.

Make use of our experience! We will be glad to show you the perspectives which will open up for your company with our ASP solutions.
