

itelligence AG signs up another customer in the high-tech sector KEB Group to use it.hightronics from itelligence in China

Bielefeld, October 7, 2004 - itelligence AG will implement an enterprise template based on it.hightronics at Karl E. Brinkmann GmbH (KEB), Barntrup, a manufacturer of electric and electromechanical drives. The enterprise template, which will initially be introduced in Germany, will define group standards that will serve as a basis for additional implementations. These group standards will then be transferred to KEB's branches. itelligence will implement these group standards at KEB's Chinese branch by January 1, 2005. Employing some 900 people worldwide, the KEB Group generated sales of EUR 125 million in 2003.

In September 2004, itelligence's consultants started to install it.hightronics, itelligence's proprietary solution for the high-tech industry, for KEB's some 30 users in China on the basis of an IBM AS 400-570 and a DB2 database. After basic installation and definition of the group standards in Germany, the system will be rolled out at KEB's Shanghai branch. The roll-out will be supported by a team consisting of KEB employees as well as consultants from SAP and itelligence. Productive use of the German SAP system at the Shanghai branch is scheduled to start as early as January 1, 2005. The Chinese branch will work directly with the company data stored in the enterprise system in Germany, i.e. there will be no separate server in Shanghai.

In a second and third phase starting in 2005, it is planned to implement the group standards at additional branches as well as at KEB's headquarters in Barntrup. More than 400 users will then be working with it.hightronics.

According to Ralf Lutter, Managing Director of KEB, the company has decided to introduce it.hightronics for the following reasons: "By implementing it.hightronics we can prepare our company for the corporate processes in international competition. The connection of our plant in Shanghai with our German headquarters will be exemplary of the enterprise-wide use of SAP at KEB. We have opted for itelligence AG as a consultancy because of their solid industry know-how and strong SAP expertise – our Chinese project will benefit significantly from the smooth cooperation between our employees and the consultants of SAP and itelligence as well as from their geographical proximity both here in Germany and in Asia."
